

**SOUTH ISLAND PUBLIC SERVICE DISTRICT
OWNER/CONTRACTOR
APPLICATION FOR WATER AND SEWER SERVICE**

As owner/contractor, I hereby make application for water and sewer service to the property listed below. I agree to comply with the following rules and regulations:

1. Water and sewer service will be requested at least two weeks prior to the need for water service. Water service to single family residences with pools, docks, commercial properties, and fire lines require backflow prevention devices. The owner is responsible for installing an approved backflow prevention device. Meter will be placed and locked until backflow is ready for testing by a SC Department of Health & Environmental Control certified tester and results sent to the District within 3 days or meter will be locked out and a 50.00 fee will be applied. Backflows must be tested yearly.
2. The location of the water meter will be along the front property line in the vicinity of the existing water service lateral. Any change from this location must be made at the time application is made.
3. When it is time to connect to the sewer lateral, call our office and request location of the sewer lateral. Sewer pipe used from the building to the service connection at the street shall be 4", minimum SDR 35, conforming to ASTM D-3034. PVC-ASTM-D2729 sewer pipe will not be accepted. When the sewer connection is completed, call the above number to arrange inspection. A 24-hour notice will be needed. **DO NOT BACKFILL UNTIL THE TAP HAS BEEN INSPECTED BY THE UTILITY.** If the Utility is not notified requesting an inspection and the sewer pipe is buried, it will be necessary for the contractor to uncover the pipe for this inspection.
4. Any damages to the Utility's sewer system, water system, water meter or laterals during the construction period will be repaired by the Utility and the cost of the repairs will be paid by the applicant upon receipt of an invoice from South Island Public Service District.
5. It is the responsibility of the applicant to keep the water meter accessible for reading. Any covering by soil, building material, debris, etc. shall be removed by the applicant.
6. Water used during the construction period will be billed to the applicant at the established rates to include any minimum rates. Bills must be mailed within the month following the service period. Payment must be made by the "Due Date" indicated on the bill.
7. Once construction is completed, it is the applicant's responsibility to contact our office at 785-6224 and inform us of the closing date and the owner's name and billing address.

I have read and understand and agree to comply with the rules and regulations for the water and sewer district as set forth this application. This application constitutes a contract between the applicant and the utility. Failure of the applicant to comply with these rules and regulations will result in termination of water service to the applicant.

Type of Service: Single-family Multi-family Irrigation Commercial: Specify _____ Pool

Owner: _____ Contractor: _____

Owner's Billing Address & Phone # _____ Contractor's Address/phone # _____

Will bill be sent to: Owner _____ Contractor _____

Property Legal Description _____

Property Mailing Address _____

Projected Completion Date _____ E-mail Address: _____

Signature of Applicant: _____ Date: _____

***THE DRIVEWAY MUST BE FLAGGED BEFORE THE METER WILL BE INSTALLED. If the driveway is not marked at the time the meter is to be set and the meter then needs to be moved, it will be at the responsibility of the contractor.**

* _____ I have read Items 1 and 3 and will not backfill before inspection, and the driveway will be marked before the meter is installed, and any double check valve required will be installed, certified and paperwork forwarded to the District.
